E-Growth Project 3ʳᵈ Newsletter

May 2022

The whole E-Growth team is feeling thrilled because one of the biggest project's milestones has been accomplished: the implementation of the C1 Short Term Joint Staff Training Event, organised by Exponential Training and Assessment (ETA) in Hinckley, Leicestershire (United Kingdom). We also used this opportunity to celebrate an operative meeting and to keep up to date about the several tasks that are in progress right now.

C1 Training the Trainer – 'Using TEL in VET"

The main objective of the C1 activity was to train and to provide, to the assistants, with tools and resources on Technology Enhanced Learning (TEL) in Vocational Education Training (VET), so they will be able to develop and implement them in the planning and implementation of their own training courses. With that final aim in mind, ETA organized a training curricula which combined theory and practice and included topics like: TEL and teacher/training competences; TEL and a Continuum of Interaction; instructional design, simulation and Serious games; collaboration platforms; E-Learning and Learning journeys; E-assessment tools; using E-Growth and PROSPER (the business simulation that is being developed by the project); Integrating TEL into VET in a VET training programme, etc.
